Hello,

I'm Uttam Kanojiya

Data Analyst

Computer Science graduate with skills in Python, SQL, Data Analysis, Power BI and Machine Learning. Experienced in data cleaning, exploratory data analysis (EDA), dashboard development and predictive modeling. Built projects including a RAG-based AI Assistant and Recommendation System. Seeking opportunities in Data Analytics and Data Science to apply analytical and problem-solving skills in real-world business scenarios.

Executive Summary

1

2

3

4

5

6

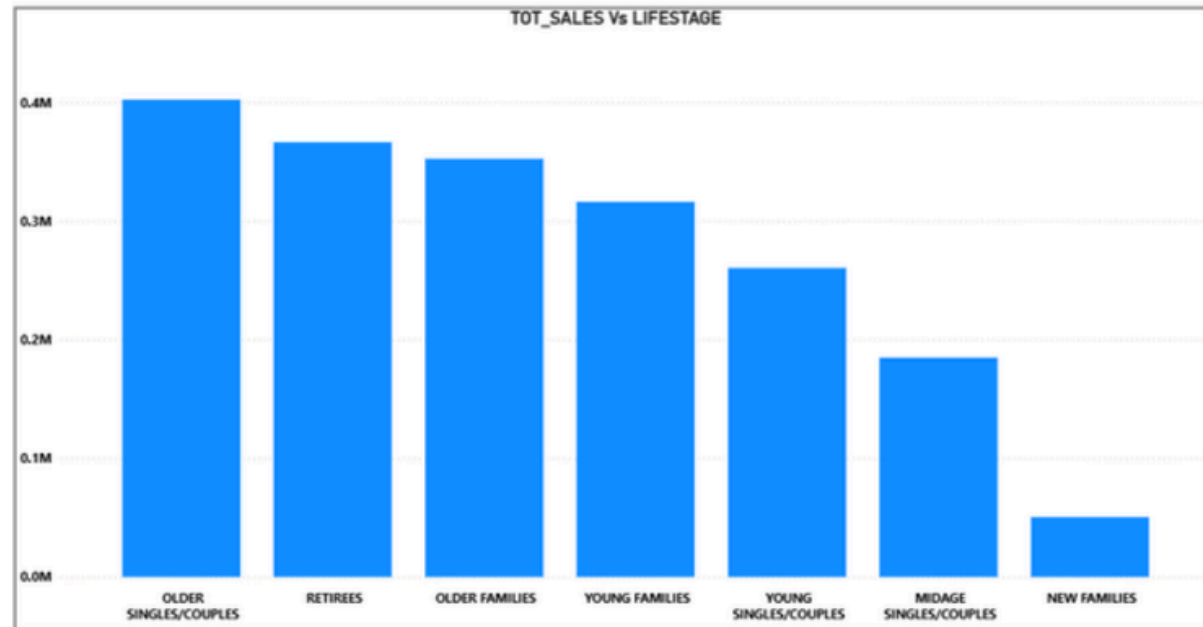

7

- Analyzed customer purchasing behaviour using transaction data.
- Evaluated trail performance for Stores 77,86 and 88.
- Identified comparable control stores using correlation and magnitude analysis.
- Generated recommendations to support future category planning.

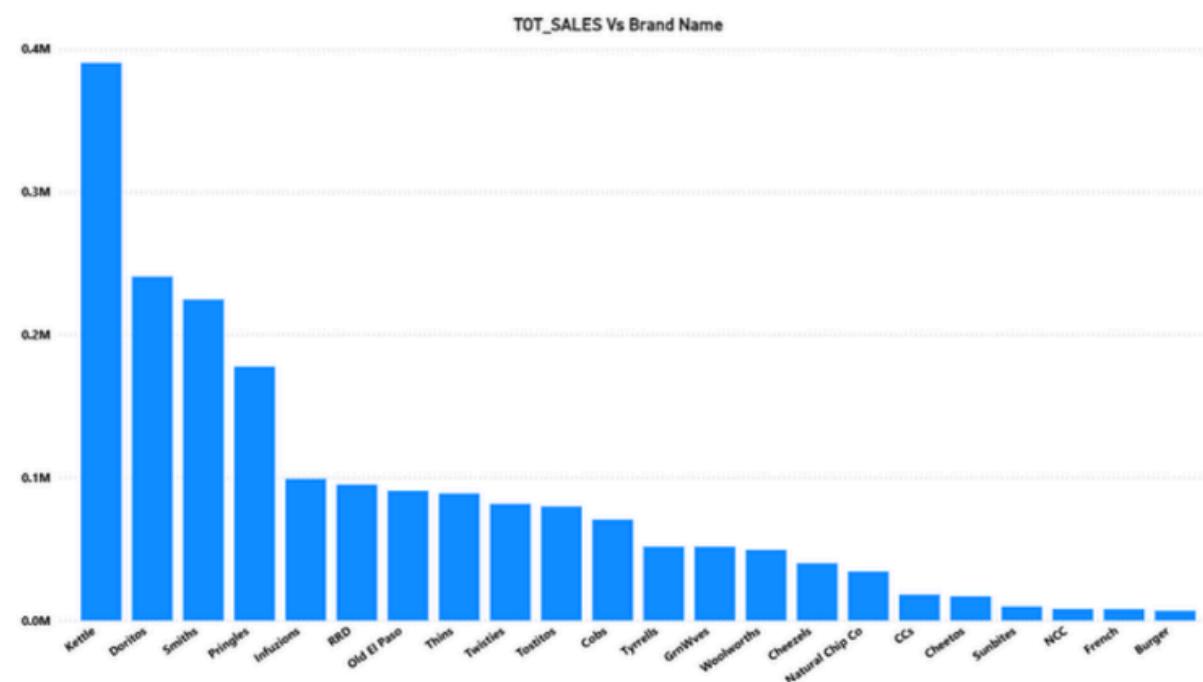

Customer Behaviour Insights

1. Sales Vs Life Stage

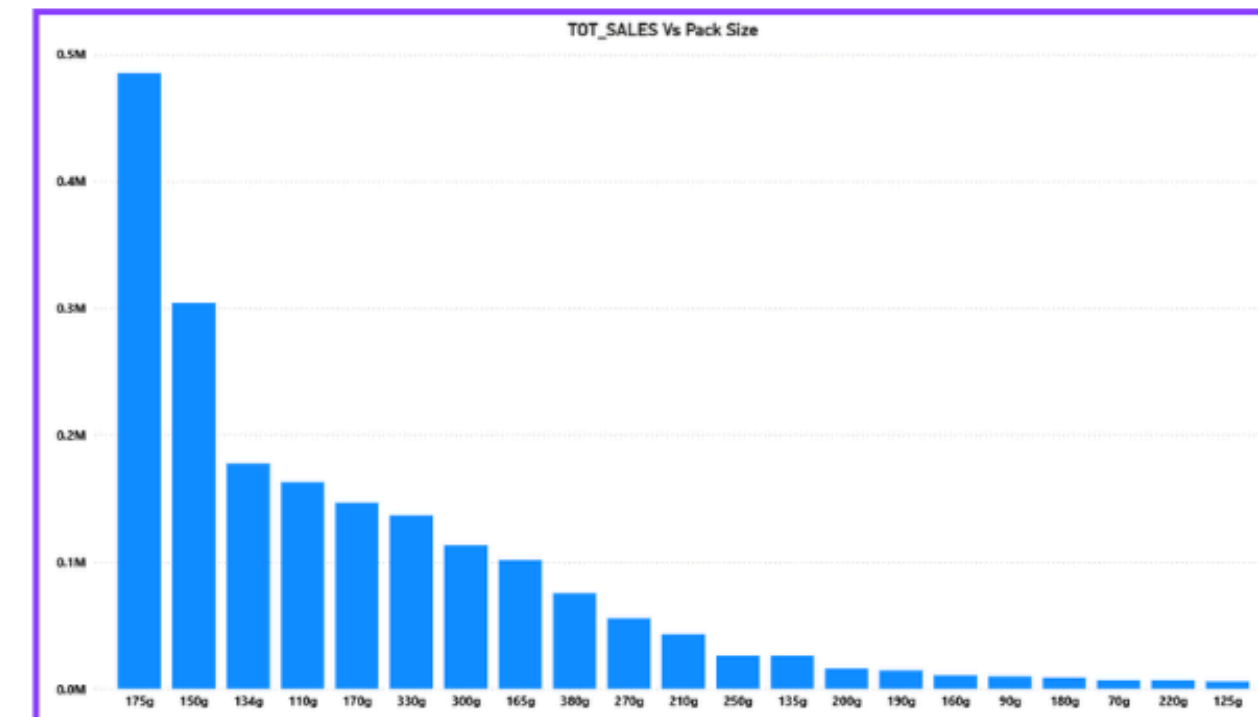

Older Families contribute the highest chip sales, indicating that families are a key revenue-generating customer segment.

2. Sales Vs Brand

Kettle and Smiths are among the top-selling brands, suggesting strong customer preference for these products.

3. Sales Vs Pack Size

Medium-sized packs (e.g., 175g) account for the highest sales, indicating they are the preferred pack size.

Trial Store Analysis

Trial Store	Control Store
77	233
86	155
88	125

Control stores were selected using Pearson Correlation and Magnitude Distance based on historical sales and customer behaviour.

Performance Comparison

1

2

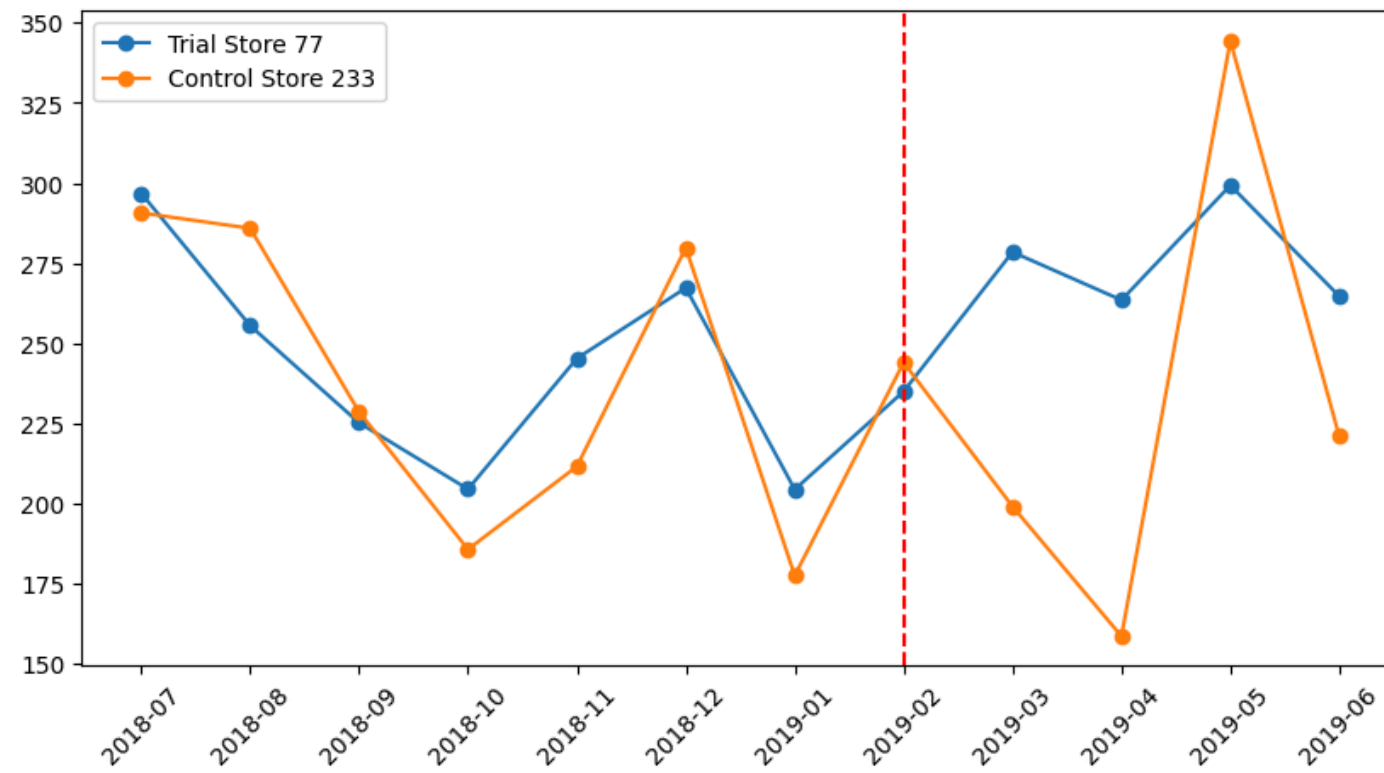

3

4

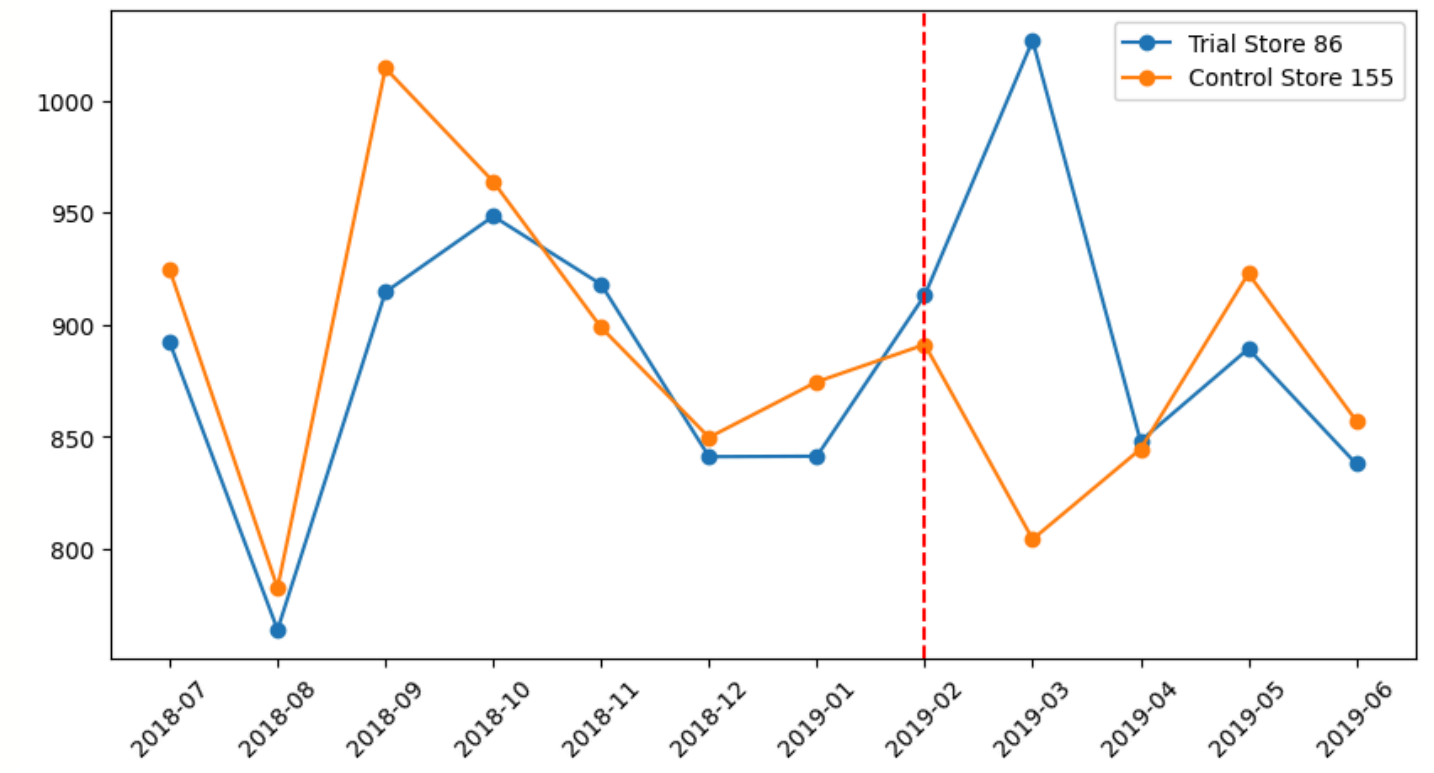

5

6

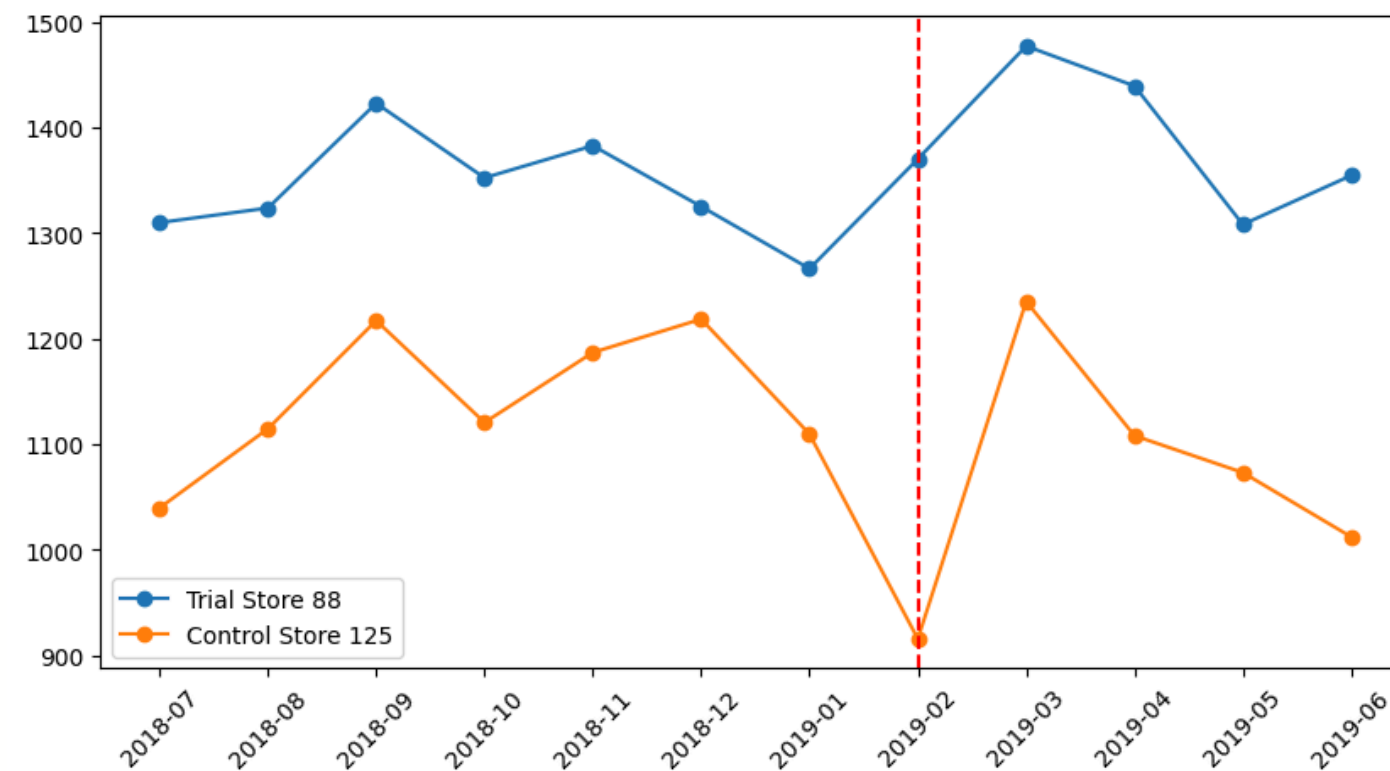

7

#Trial Store 77 experienced higher sales during the trial period compared to its control store.

#Trial Store 86 experienced higher sales during the trial period compared to its control store.

#Trial Store 88 experienced higher sales during the trial period compared to its control store.

Recommendation

5

6

7

- Continue strategies used in Store 77 if it demonstrated positive performance.
- Focus marketing campaigns on high-value customer segments.
- Maintain inventory of popular brands and pack sizes.
- Monitor customer purchasing behaviour regularly.

THANK YOU
